

Candidate Features#

Here are some ideas for future releases:

- 64 bit processes
- Virtualization
- Remote Device Update
- Live Kernel Update
- Power Management
- [Kernel Introspection](#)
- SMP_MSGOPT enabled for all SMP architectures
- Sanity checker program for the system page
- Optimize kernel per-cpu data layout for better cache performance
- Instrumentation / tooling
- [Memory Partitioning](#)

What can I do?#

If you are interested in adding new ideas, bring it to the attention of the team through the [forums](#).
